SAVI

SAVI helps people and organizations make data-informed decisions.

We do this by providing community-level data, creating actionable information, developing public data tools, and training people and organizations to use data.

Our data tools cover a broad range of topics.

Health
Births, deaths, prenatal care, disabilities, county-wide disease rates, and more.

Education
Educational attainment, graduation rates, enrollment, test results, and more.

Financial Stability
Poverty, public assistance, calls for financial assistance, and more.

Transportation
Bus routes and stops, commute mode, bike/ped crashes, and more.

Demographics
Population, age, race, gender, family type, household size, and more.

Public Safety
Violent crime, property crime, juvenile crime, fire and police stations.

Housing
Dwelling units, vacancy, assessed value, building permits, rent, and more.
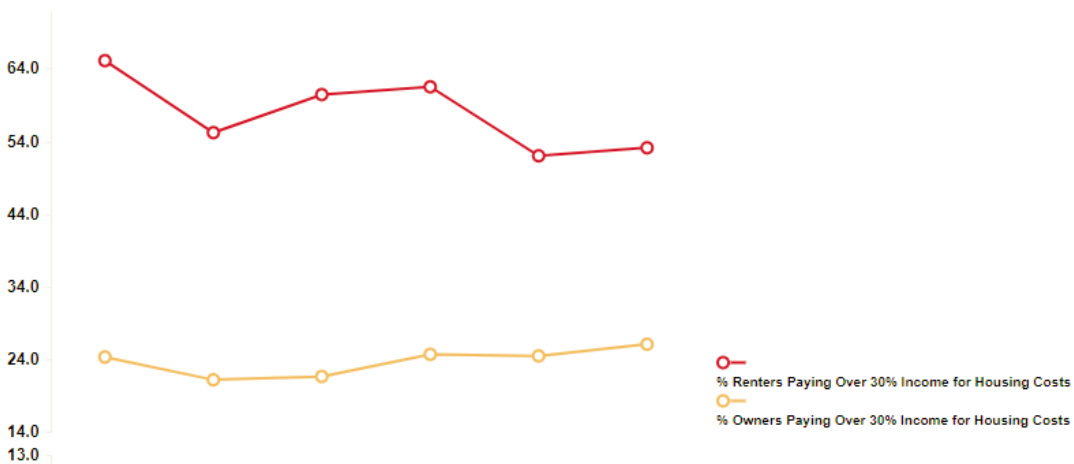

Economy
Jobs, unemployment, commercial building permits, and more.

Our tools allow anyone to quickly visualize data in dynamic ways, transforming our data holdings into actionable information.

Community Profiles

Percent of Households with Housing Cost Burden By Tenure
2010-2015
For Garfield Park

○— % Renters Paying Over 30% Income for Housing Costs
○— % Owners Paying Over 30% Income for Housing Costs

IndyVitals

SAVI transforms data into action.

1 We help organizations **derive meaning out of data** and use it to inform their actions.

2 We **create data indicators and community metrics** by transforming raw, messy data into meaningful metrics to measure progress and success.

3 We **create actionable information** through reports and analysis of current community issues.

4 We **consult with and support organizations** in their use of data to inform their goals, provide results, and communicate their work effectively.

5 We **teach organizations** how to derive meaning out of data through our data literacy training program.

SAVI is a project of The Polis Center at IUPUI, part of the Indiana University Shool of Liberal Arts at IUPUI.
